

Curriculum Vitae
STEPHEN R. SHARPE

Contact Information

Department of Physics
University of Washington
Seattle, WA 98195–1560

phone: (206) 685-2395
fax: (206) 685-0635
email: srsharpe@uw.edu

Education

Ph.D. Physics, University of California, Berkeley, 1983 (Advisor, Michael Chanowitz)
B.A. Theoretical Physics, Trinity College, Cambridge University, 1978

Research and Professional Experience

1995-present, Professor, University of Washington
1991-1995, Associate Professor, University of Washington
1988-1991, Assistant Professor, University of Washington
1986-1988, Five-year Research Associate, SLAC
1983-1986, Junior Fellow, Harvard Society of Fellows

Visiting Positions

Visiting Professor, Kyoto University, 2019
George Southgate Fellow, University of Adelaide, 2019
Visiting Professor, University of Marseille, 2008
Visiting Professor, University of Southampton, 2004
Visiting Professor, University of Tsukuba, 1998
Visiting Professor, University of Rome, 1996
Visiting Staff Scientist, CEBAF (now Jefferson Lab), 1991-2
Visiting Research Physicist, UC Santa Barbara, 1990

Honors and Awards

Undergraduate Teaching Award, Physics Department, UW, 2015
Undergraduate Teaching Award, Physics Department, UW, 2014
Graduate Mentoring Award, Physics Department, UW, 2013
Graduate Teaching Award, Physics Department, UW, 2011
Graduate Teaching Award, Physics Department, UW, 2008
Outstanding Referee, American Physical Society, 2007
Graduate Teaching Award, Physics Department, UW, 2000
Graduate Teaching Award, Physics Department, UW, 1999
Fellow, American Physical Society, 1993
Alfred P. Sloan Foundation Fellow, 1990-1994
DOE Outstanding Junior Investigator, 1989-1991
B. Friedman Memorial Prize in Mathematics, Berkeley, 1982

University & Department Service (major responsibilities only)

Associate Chair, Physics Department, 2019-present

Chair, Theoretical Physics Search Committee, 2019-20
Chair, Majors Committee, 2016-18
Chair, Search Committee for Physics Education Research position, 2015-16
Associate Chair, Physics Department, 2009-2011
Member, Graduate School Council, 2008-2011
Graduate Program Coordinator, Physics Department, 2002-2011
Member, Executive Committee, Physics Department, 1999-2001, 2007-2011
Chair, Graduate Committee, Physics Department, 2001-2
Chair, Undergraduate Committee, 1995-6

Ph.D. advisees

Huangyu Xiao, Ph.D. expected 2021
Tyler Blanton, Ph.D. expected 2021
Fernando Romero-López (visiting student from University of Valencia), Ph.D. expected 2021
John Lombard, Ph.D. 2018
Derek Horkel, Ph.D. 2016
Max Hansen, Ph.D., 2014
Mateusz Koren, (visiting student from Jagiellonian University, Krakow), Ph.D. 2013
Andrew Lytle, Ph.D. 2010
Ruth van de Water, Ph.D. 2005
Jackson Wu, Ph.D. 2005
Noam Shores, Ph.D. 2001 (co-chair)
Yan Zhang, Ph.D. 1997
Keith Clay Ph.D. 1995 (co-chair)
Greg Kilcup (unofficial advisor), Harvard Ph.D. 1985

Professional Service

Editor, JHEP, 2015-present
Member, Editorial Board, Flavor Lattice Averaging Group, 2014-present
Lattice coordinator, Chamless Hadronic B Decay & Charm working groups, “Belle-2-Theory Interface Platform”, 2014-present
Member, Particle Data Group, 2011-present
Organizer, “Scattering amplitudes and resonance properties from Lattice QCD”, workshop at the Mainz Institute for Theoretical Physics, August 27-31, 2018
Organizer, “Multi-hadron systems from lattice QCD”, workshop at the Institute for Nuclear Theory, Feb. 5-9, 2018
Member, International Adv. Comm., “Lattice 2018”, Michigan State, 2018
Member, International Adv. Comm., “Chiral Dynamics”, Durham, NC, 2018
Member, Advisory committee, RIKEN/BNL Research Center, 2015-2018
Member, International Adv. Comm., “Hadrons and Hadron Interactions in QCD,” Yukawa Institute workshop, Kyoto, Japan 2015
Convener, ICHEP 2014, Valencia, Spain
Member, Steering Committee, Topical Panel on Computing in High Energy Physics, DOE, 2013-14
Member, International Adv. Comm., “Chiral Dynamics 2015”, Pisa, Italy, 2015
Chair, Ken Wilson Lattice Award Committee, 2014
Vice-Chair, Ken Wilson Lattice Award Committee, 2013

Member, Flavor Lattice Averaging Group, 2011-2014
 Member, US National Lattice QCD Collab. Exec. Committee, 1999–2012
 Member, International Adv. Comm., “Chiral Symmetry in Hadrons and Nuclei”, Beijing, China, 2013
 Member, International Adv. Comm., “Lattice 2013”, Mainz, Germany, 2013
 Member, International Adv. Comm., “Lattice 2012”, Cairns, Australia, 2012
 Member, International Adv. Comm., Parma School of Theoretical Physics, 2009-present
 Member, International Adv. Comm., “Lattice 09”, Beijing, China, 2009
 Member, DOE-HEP Early Career Award Panel, 2009
 Panel chair, DOE workshop on “Extreme Scale Computing”, Kavli Institute, SLAC, December 2008
 Organizer, INT summer school “Lattice QCD and its Applications”, August 2007
 Member, US Lattice Coll. Scientific Program Committee, 2002–2007
 Member, International Adv. Comm., “Lattice 07”, Regensburg, Germany, 2007
 Member, Riken-Brookhaven Review Committee, 2003–2006
 Member, International Adv. Comm., “CKM 2006”, KEK, Japan, 2006
 Member, Editorial Board, Physical Review D, 2003–2005
 Member, Sakurai Prize Committee of the APS, 2004–5
 Member, International Adv. Comm., “Lattice 05”, Dublin, Ireland, 2005
 Member, International Adv. Comm., “CCP 2004”, Genoa, Italy, 2004
 Member, International Adv. Comm., “Lattice 04”, Fermilab, USA, 2004
 Member, International Adv. Comm., “Lattice 03”, Tsukuba, Japan, 2003
 Member, Organizing Comm., INT-JLAB Workshop in “Gluonic Excitations”, JLAB, May 2003
 Member, International Adv. Comm., “Lattice 02”, Boston, USA, 2002
 Member, International Adv. Comm., “Lattice 01”, Berlin, Germany, 2001
 Organizer of Workshop “Lattice QCD and Hadron Phenomenology”, INT, Seattle, Autumn 2001
 Member, Local Organizing Committee for “Lattice 98”, Boulder, Colorado, 1998
 Organizer of INT Workshop “Improved Actions for Lattice QCD”, September 1996
 Divisional Associate Editor, Physical Review Letters, 1994–1996
 Member, Scientific Advisory Committee, 10th Aspen Winter Conference, 1994
 Organizer, INT program and Summer School, “*Phenomenology and Lattice QCD*,” Seattle, 1993
 Member, International Adv. Comm., “Lattice 92”, Amsterdam, 1992
 Member, International Adv. Comm., “Lattice 91”, Tsukuba, Japan, 1991
 Coordinator, Institute for Theoretical Physics program “*Lattice Gauge Theory: Standard Model and Beyond*”, Santa Barbara, 1990

Classroom Teaching (all at UW)

Graduate Quantum Mechanics (Phys 517-9): 1995-6, 2007, 2009-2011, 2018, 2019-20
 Particle Physics (Phys 557): 2017-2018
 Particles and Symmetries (Phys 226): 2015, 2016, 2017
 Lattice Field Theory and Applications (Phys 578): 2014
 Elementary Mathematical Physics (Phys 227-8): 2012-15
 Physical Applications of Group Theory (Phys 507): 2009, 2013, 2015, 2017
 Senior & Honors Seminars: 1993, 2005, 2008
 Graduate Mechanics (Phys 505): 2006-8
 Introductory Calculus-based Physics (Phys 121-3): 1988-3, 2005, 2007, 2008, 2016
 Honors Introductory Physics (Phys 121H-123H): 2001-4

Quantum Field Theory—special topics (Phys 578): 2001
Advanced Quantum Mechanics & Intro. to Field Theory (Phys 520-2): 1997-2001
Statistical Mechanics (Phys 328): 2004
Particle Physics (Phys 558-9): 1988-9, 1994

Invited Lecture Series & Plenary Conference Talks

Multihadron physics from Lattice QCD, 4 lectures at School on “Frontiers of Lattice QCD”, Beijing, China, June-July 2019
Effective Field Theories for Lattice QCD, 4 lectures at School and Workshop on “New Horizons in Lattice Field Theory”, Natal, Brazil, March 2013
Future Applications of Lattice QCD for High Energy Physics, INT summer school, August 2012
Exploring the large N limit of lattice QCD, International Symposium “From Quarks to Supernovae”, Izu, Japan, November 2010
Lattice QCD—a robust tool for precise calculations, Symposium in honor of Jan Smit’s retirement, Amsterdam, Holland, August 2008
Applications of Chiral Perturbation to Lattice QCD, 3 lectures at “Physique subatomique et calculs sur reseau”, summer school, Marseille, France, June 2008
Rooted staggered fermions: good, bad or ugly?, Int. Symp. on Lattice Field Theory, “Lattice 2006”, Tucson, Arizona, July 2006
Applications of chiral perturbation theory to lattice QCD, 3 lectures at workshop on “Perspectives in Lattice QCD”, Nara, Japan, November 2005.
Introduction to chiral perturbation theory, 6 lectures at Univ. Southampton, England, November 2004
Applications of chiral perturbation theory to lattice QCD, 3 lectures at school on “Masses of Hadrons”, Bad Honnef, Germany, October 2003
Chiral perturbation theory for lattice practitioners, 3 lectures at Seoul National University, South Korea, May 2002
Chiral perturbation theory for lattice practitioners, 3 lectures at workshop on “Effective Theories, Renormalization and Matching”, Univ. Southampton, England, January 2002
Chiral perturbation theory and its applications to lattice results, 10 lectures at Univ. Tsukuba, Japan, Autumn 1998
Progress in Lattice Gauge Theory, Int. Conf. on High Energy Physics, Vancouver, Canada, July 1998
Introduction to chiral perturbation theory, 8 lectures at University of Rome, Italy, Autumn 1996
Chiral perturbation theory and weak matrix elements, Int. Symp. on Lattice Field Theory, “Lattice 96”, St. Louis, Missouri, June 1996
Phenomenology from the Lattice, 4 lectures at Theoretical Advanced Study Institute, Boulder, Colorado, July 1994
Introduction to lattice gauge theory, 5 lectures at Uehling summer school, INT, UW, June 1993
Lattice Field Theory, Division of Particles and Fields meeting, American Physical Society, Fermilab, Chicago, November 1992
Lattice gauge theory, 6 lectures at British Universities Summer School on elementary particle physics, Edinburgh, Scotland, September 1992
Chiral perturbation theory, the quenched approximation and finite volume effects, 5 lectures at the UK High Energy Physics Institute, Durham, England, September 1992
Towards the continuum limit of staggered weak matrix elements, Int. Symp. on Lattice Field Theory, “Lattice 91”, Tsukuba, Japan, November 1991

Lattice gauge theory, 12 lectures at Jefferson Lab, Newport News, Virginia, Autumn 1991
Lattice results for hadron masses and weak matrix elements, Zakopane spring school, Poland, June 1990
Electroweak matrix elements, “Lattice 89”, Capri, Italy, September 1989

Seminars, Colloquia & Conference Talks (since 2010)

I = 3 three-pion scattering amplitude from Lattice QCD, contributed talk at Santa Fe workshop on “Lattice QCD”, August 2019
Implementing the three-particle quantization condition: a progress report, invited seminar at Santa Fe workshop on “Lattice QCD”, August 2019
Implementing the three-particle quantization condition: a progress report, invited seminar at CERN workshop, July 2019
Implementing the three-particle quantization condition: a progress report, invited seminar at YITP, Kyoto at FLQCD19 workshop, April 2019
Scattering observables from Lattice QCD: progress in three-particle channels, seminar at INT, Seattle, March 2019
Lattice QCD: successes, challenges and future outlook, invited colloquium at University of Adelaide, February 2019
Scattering observables from Lattice QCD: progress in three-particle channels, invited seminar at University of Adelaide, February 2019
Scattering observables from Lattice QCD: progress in three-particle channels, invited talk at MIAPP workshop on “Interface of Effective Field Theories and Lattice Gauge Theory”, Munich, November 2018
Scattering observables from Lattice QCD: progress in three-particle channels, invited seminar at U. Valencia, Spain, October 2018
Progress on the relativistic three-particle quantization condition, invited talk at MITP workshop on “Scattering amplitudes and Resonance Properties from Lattice QCD”, August 2018
Progress on the relativistic three-particle quantization condition, contributed talk at Lattice 2018, July 2018
Workshop goals and introduction to Lüscher formalism for two particles, talk at INT workshop on “Multihadron physics from Lattice QCD”, February 2018
Scattering observables from lattice QCD: progress in two- and three-particle channels, seminar at Stanford Linear Accelerator Center, September 2017
Numerical experiments with three-particle quantization condition, contributed talk at Santa Fe workshop on Lattice QCD, September 2017
Multihadron observables from lattice QCD, invited talk at Santa Fe workshop on Lattice QCD, August 2017
Scattering observables from lattice QCD: progress in three-particle channels, seminar at Lawrence Berkeley Lab, March 2017
Lattice QCD: successes, challenges and future outlook, colloquium at San Francisco State University, March 2017
Phase structure of Wilson and twisted-mass fermions in the presence of isospin breaking, seminars at Universities of Bonn and Mainz, July 2016
Future of Chiral Perturbation Theory for Lattice QCD, invited talk at Symposium on “Effective Field Theories and Lattice Gauge Theory”, Munich-IAS, May 2016

Chiral Perturbation Theory and Lattice QCD, invited talk at “BernardFest2016”, Washington Univ., St. Louis, March 2016

Multiparticle processes from lattice QCD, invited talk at workshop on “QCD for New Physics at the Precision Frontier,” INT, Seattle, September 2015

Multiparticle processes from lattice QCD, invited talk at workshop on “High-precision QCD at low energy,” Centro de Ciencias, Benasque, Spain, August 2015

Lattice QCD: successes, challenges and future outlook, colloquium at UCSC, May 2015

Three particle scattering amplitudes from finite volume simulations, invited talk at workshop on “Hadrons and Hadron Interactions in QCD 2015”, Yukawa Institute, Kyoto, March 2015

Finite volume quantization conditions for multiparticle states, invited talk at workshop on “Multi-hadron and Nonlocal matrix Elements in Lattice QCD”, Brookhaven Nat. Lab., February 2015

Extracting three particle scattering amplitudes from the finite volume spectrum, invited seminar at Jefferson Lab., December 2014

Applying chiral perturbation theory to LQCD: successes and challenges, invited talk at “CreutzFest 2014”, BNL, September 2014

Three-particle quantization condition: an update, contributed talk at “Lattice 2014”, Columbia Univ., June 2014

Kaons and long-distance meson mixing from lattice QCD, invited talk at “Lattice QCD meets Experiment 2014”, Fermilab, March 2014

Extracting 3-particle scattering amplitudes from the finite-volume spectrum, invited talk at STRONGNET workshop, Graz, Austria, September 2013

Relativistic, Model-independent 3-particle quantization condition: (2) Threshold expansion, talk at “Lattice 2013”, Mainz, Germany, July 2013

Can Eguchi-Kawai reduction provide a practical method for studying large- N_c theories on the lattice?, invited lecture at Cracow school of Theoretical Physics, Zakopane, Poland, June 2013

Lattice QCD for the Intensity Frontier, invited talk at USQCD All-Hands meeting, Brookhaven Lab, April 2013

Multiple-channel generalization of Lellouch-Lüscher formula, invited INT seminar, UW, August 2012

Chiral extrapolation of matrix elements of BSM kaon operators, talk at “Lattice 2012”, Cairns, Australia, July 2012

Comments on non-degenerate staggered fermions, staggered-Wilson and Overlap fermions, and the application of chiral perturbation theory to lattice fermions, invited talk at workshop on “New fermion discretizations”, Yukawa Institute, Kyoto, February 2012

Lattice QCD: successes, challenges and future outlook, colloquium at Seoul National University, South Korea, November 2011

Using chiral perturbation theory to study Wilson(-like) fermions: Introduction, a small proposal and open questions, invited talk at ECT* workshop on “Chiral Dynamics with Wilson fermions”, Trento, Italy, October 2011

Nonperturbative renormalization for general improved staggered bilinears, talk at “Lattice 2011”, Squaw Valley, California, July 2011

Large- N QCD from simulations on a single site?, seminar at Brookhaven National Lab, March 2011

Using volume reduction to study QCD-like theories at large N_c , invited talk at CERN workshop “Future directions in lattice gauge theory”, Geneva, Switzerland, July 2010

Kaon physics on the lattice, invited talk at “Lattice meets Experiment”, Fermilab, Chicago, April 2010
